PLTW Launch Modules Overview K-5 Louisiana Student Standards

This curriculum guide provides standards connections for 4 bodies of standards:

- **1. Science**
- **2. ELA**
- 3. Math

4. Computer Science Teachers Association (CSTA) K-12 Computer Science Standards

Each PLTW Launch Module integrates science performance expectations (PEs) with science and engineering practices (SEPs), disciplinary core ideas (DCIs), and crosscutting concepts (CCCs), while focusing on engineering, computer science, or one of the three domains of science:

- Physical Science
- Life Science
- Earth and Space Science

The Curriculum Framework for each PLTW Launch module, *found in the Teacher Guide*, is another valuable planning tool. The framework offers a big-picture view of the module that includes the desired results of student learning, an overview of the module's scaffolded approach to learning, and assessment opportunities found in each activity, project, and problem.
