Martha McCabe
Senior Vice President of Community Partnerships
Email: mmccabe@pltw.org
Why Build A Community Partnership Team?

- Build Support for Your Program
- Exposure to Careers
- Enhance Student Professional Skills
- Teacher Understanding of the Future of Work
- Community, Parent, and Student Engagement
Community Partnership Framework

The Community Partnership Framework outlines the steps you can take to build and sustain a community partnership team. The Framework guides you as you think through key aspects in each step of the process to develop an effective partnership team.
For **Launch**, resources are in the Launchpad within the **Launch Module-specific PD Resources** course.
Think - Who

**Identify potential partners.** Who are potential partners to do this work with you? How might they be important to the partnership?

**Conduct outreach by sending emails to potential partners.** Invite them to your classroom to see PLTW in action. Ask them to join your partnership team to help shape the scope of work for the team.

**Identify the roles and responsibilities of each team member.** Who are the conveners/leaders, key partners, experts, and support?

**Resources**

- Outreach Email Template
- PLTW Curriculum
Initiate - Why

Establish the Partnership Purpose. Use the Purpose of a Partnership Team worksheet to guide your thinking about why your team exists.

Determine Partnership Type. For example: student mentoring, guest speakers, presenting real-world problems, job shadowing, internships, apprenticeships, field trips, tours, and contests.

Identify Current State. After your team is formed, talk to your partners about what they already are doing that aligns with your guiding question. Is it successful? How do they know?

Establish Goals. What are some short-term and long-term goals your team has for this partnership?

Resources:

• Purpose of a Partnership Team worksheet
• Employer Opportunity Documents
• Higher Education Partnership Documents
Implement - How

Communication and Collaboration.
• Invite any additional community partners to participate in the team’s selected activities, events, and strategies.
• Have students send thank-you cards to partners.
• Share student progress and stories with your partnership team and community.

Measure Success, Assess, and Celebrate!
• Is this partnership meeting the designated outcomes and goals?
• What is working well in the partnership and could be extended to reach more students?
• Share your partnership success stories with PLTW and on social media channels.

Resources
• PLTW Blog: Everyone’s a Maker
• PLTW Blog: University of Washington School of Medicine Students Provide Learning Opportunity for PLTW Students
• PLTW Blog: Engineering Real-World Learning
Build - What

**Identify projects and solutions.** What partnership models currently exist at partner locations, and could they be replicated for this context? What can you create together as a team that creates synergy toward the goal?

**Co-create a pilot project!** Identify one or two small goals your team wants to achieve this year around a proposed project.

**Prepare students.** Have students practice professional communication by doing presenting in class.

**Resources**

- [Professional Communication](#)
Sustain – What's Next?

Reflect and Redesign.

- Ask the team, What went well? What didn’t go well? What are areas of strength and weakness?
- For the next iteration of the project, do you need to make any changes to how the project is currently being implemented?
- What will you continue? What is next for the team?

Resources

- Reflective Protocol
Sharing Best Practices

• Who have you engaged with locally?
• What types of events have you done?
• How did you originally connect with them?
• How has this impacted your program?
