

Safely Cleaning and Sanitizing Classroom Equipment and Supplies

Updated: 8/19/2020

In an effort to assist schools in keeping equipment and supplies clean, here are cleaning suggestions from some of our equipment partners. This document will be updated with more item specific guidance as it becomes available.

School districts should follow requirements and recommendations from the CDC, their state and local health departments, and specific district policies, as well as any guidance from product manufacturers.

Here are links for more detail from some of our equipment and supplies partners:
